

Technical Data Sheet

TPJ 303 HD (HDPE Black Jacketing compound)

DESCRIPTION

is a High density polyethylene black jacketing compound combining excellent processing and environmental stress crack performance. It contains a well dispersed carbon black, to impart excellent UV degradation resistance, and an antioxidant package to impart excellent resistance to thermo-oxidative degradation.

APPLICATION

is for jacketing of medium / high voltage power & telephone cables produced at high extrusion speeds.

SPECIFICATIONS

T complies with the following raw material specification & jacketed cables standards.

ASTM D 1248 Type 3, Class C, Category 5, Grade J4, J5 & E10

ICEA S-84-608-1994, BS 6234: Type 03C, TS1 /TS2

IEC 60502: Type ST3/ST7, IEC 60840 Type ST3/ST7

Properties

Tests	Test Method	Unit	Typical Values
Density	ASTM D1505	g / cm³	0.956
Melt flow rate	ASTM D1238	g /10min.	0.4
Carbon Black Content	ASTM D1603	Wt %	2.56
Tensile Strength ⁽¹⁾	IEC 60811-1-1	MPa	26
Elongation at break ⁽¹⁾	IEC 60811-1-1	%	850
Environmental Stress Cracking (F ₂₀)	IEC 60811-4-1/B	h	>1000
Dielectric Strength (2)	IEC 60243	KV/mm	>21
DC Volume Resistivity (2)	ASTM D 257	Ω.cm	1 x 10 ¹⁵

(1)Tests performed on 0.8 mm extruded tape. (2)Tests performed on 2 mm pressed sheet.

Packaging

T pellets available in the following packages: -

- * 25 kg moisture resistant heat sealed sacks and palletized, net weight 500 kg stretch wrapped for environment protection.
- * 500 / 1000 kg Boxes with moisture resistant liner, palletized boxes stretch wrapped for environment protection.

Processing:

T possesses excellent extrusion characteristics; as a general guide, a melt temperature in the range of 210°C to 230°C yields satisfactory results. Precise temperature profile values will vary depending on the extruder type, die tooling, cable size and line speed employed.

Storage & Handling

T must be stored unopened in a dry & stable temperature environment for optimum performance. A temperature range of 10 °C to 45 °C is recommended.
